

Introduction to Waste Assessment will benefit employers who have a workforce involved in a variety of waste management roles including:

- Waste Management Sales Representatives who require an effective tool to assist clients, better manage their waste stream
- Waste Management Managers/Site Managers who want to better understand how effective their waste management systems, are and where improvements may be made
- Waste Auditors interested in broadening their waste auditing skills

Learning Outcomes: This course is designed for people who work in the waste management industry. Active participation shall enable participants to:

- Describe the stages in conducting a Waste Assessment
- Describe the outcomes of a Waste Assessment
- Use the tools presented during the session to record data and information
- Appreciate the types of information required to achieve a valid outcome
- Understand the safety issues that may arise during a Waste Assessment
- Use the risk assessment tool demonstrated in the session
- Interpret data obtained and understand its limitations
- Prepare a waste assessment report which incorporates all key aspects

What do I need to do?: You will need to participate in all training and assessment activities and demonstrate application of knowledge by successfully completing all assessments.

Typical Course Coverage: Full-day instructor-led training session incorporating [academy](#) "MiniClass" structures.
